

**Western Bark Beetle Initiative (WBBI) Grant Program** focuses on protecting high value trees, creating and maintaining healthy strands of trees, reducing bark beetle attacks and tree mortality, encouraging landowners to implement prevention and restoration projects, restoring and maintaining healthy ecosystems, and reducing fire risk secondarily.

Applications for the Western Bark Beetle Initiative Grant Program **are now being accepted for Fiscal Year 2008**. The application form and instructions are still available at the links shown below for reference purposes.

During the application period the Division requires a paper copy of the proposal and an e-mail attachment in MS Word format.

**Questions about the grant can be sent to the following:**
